

# FR Reproducible Research Network

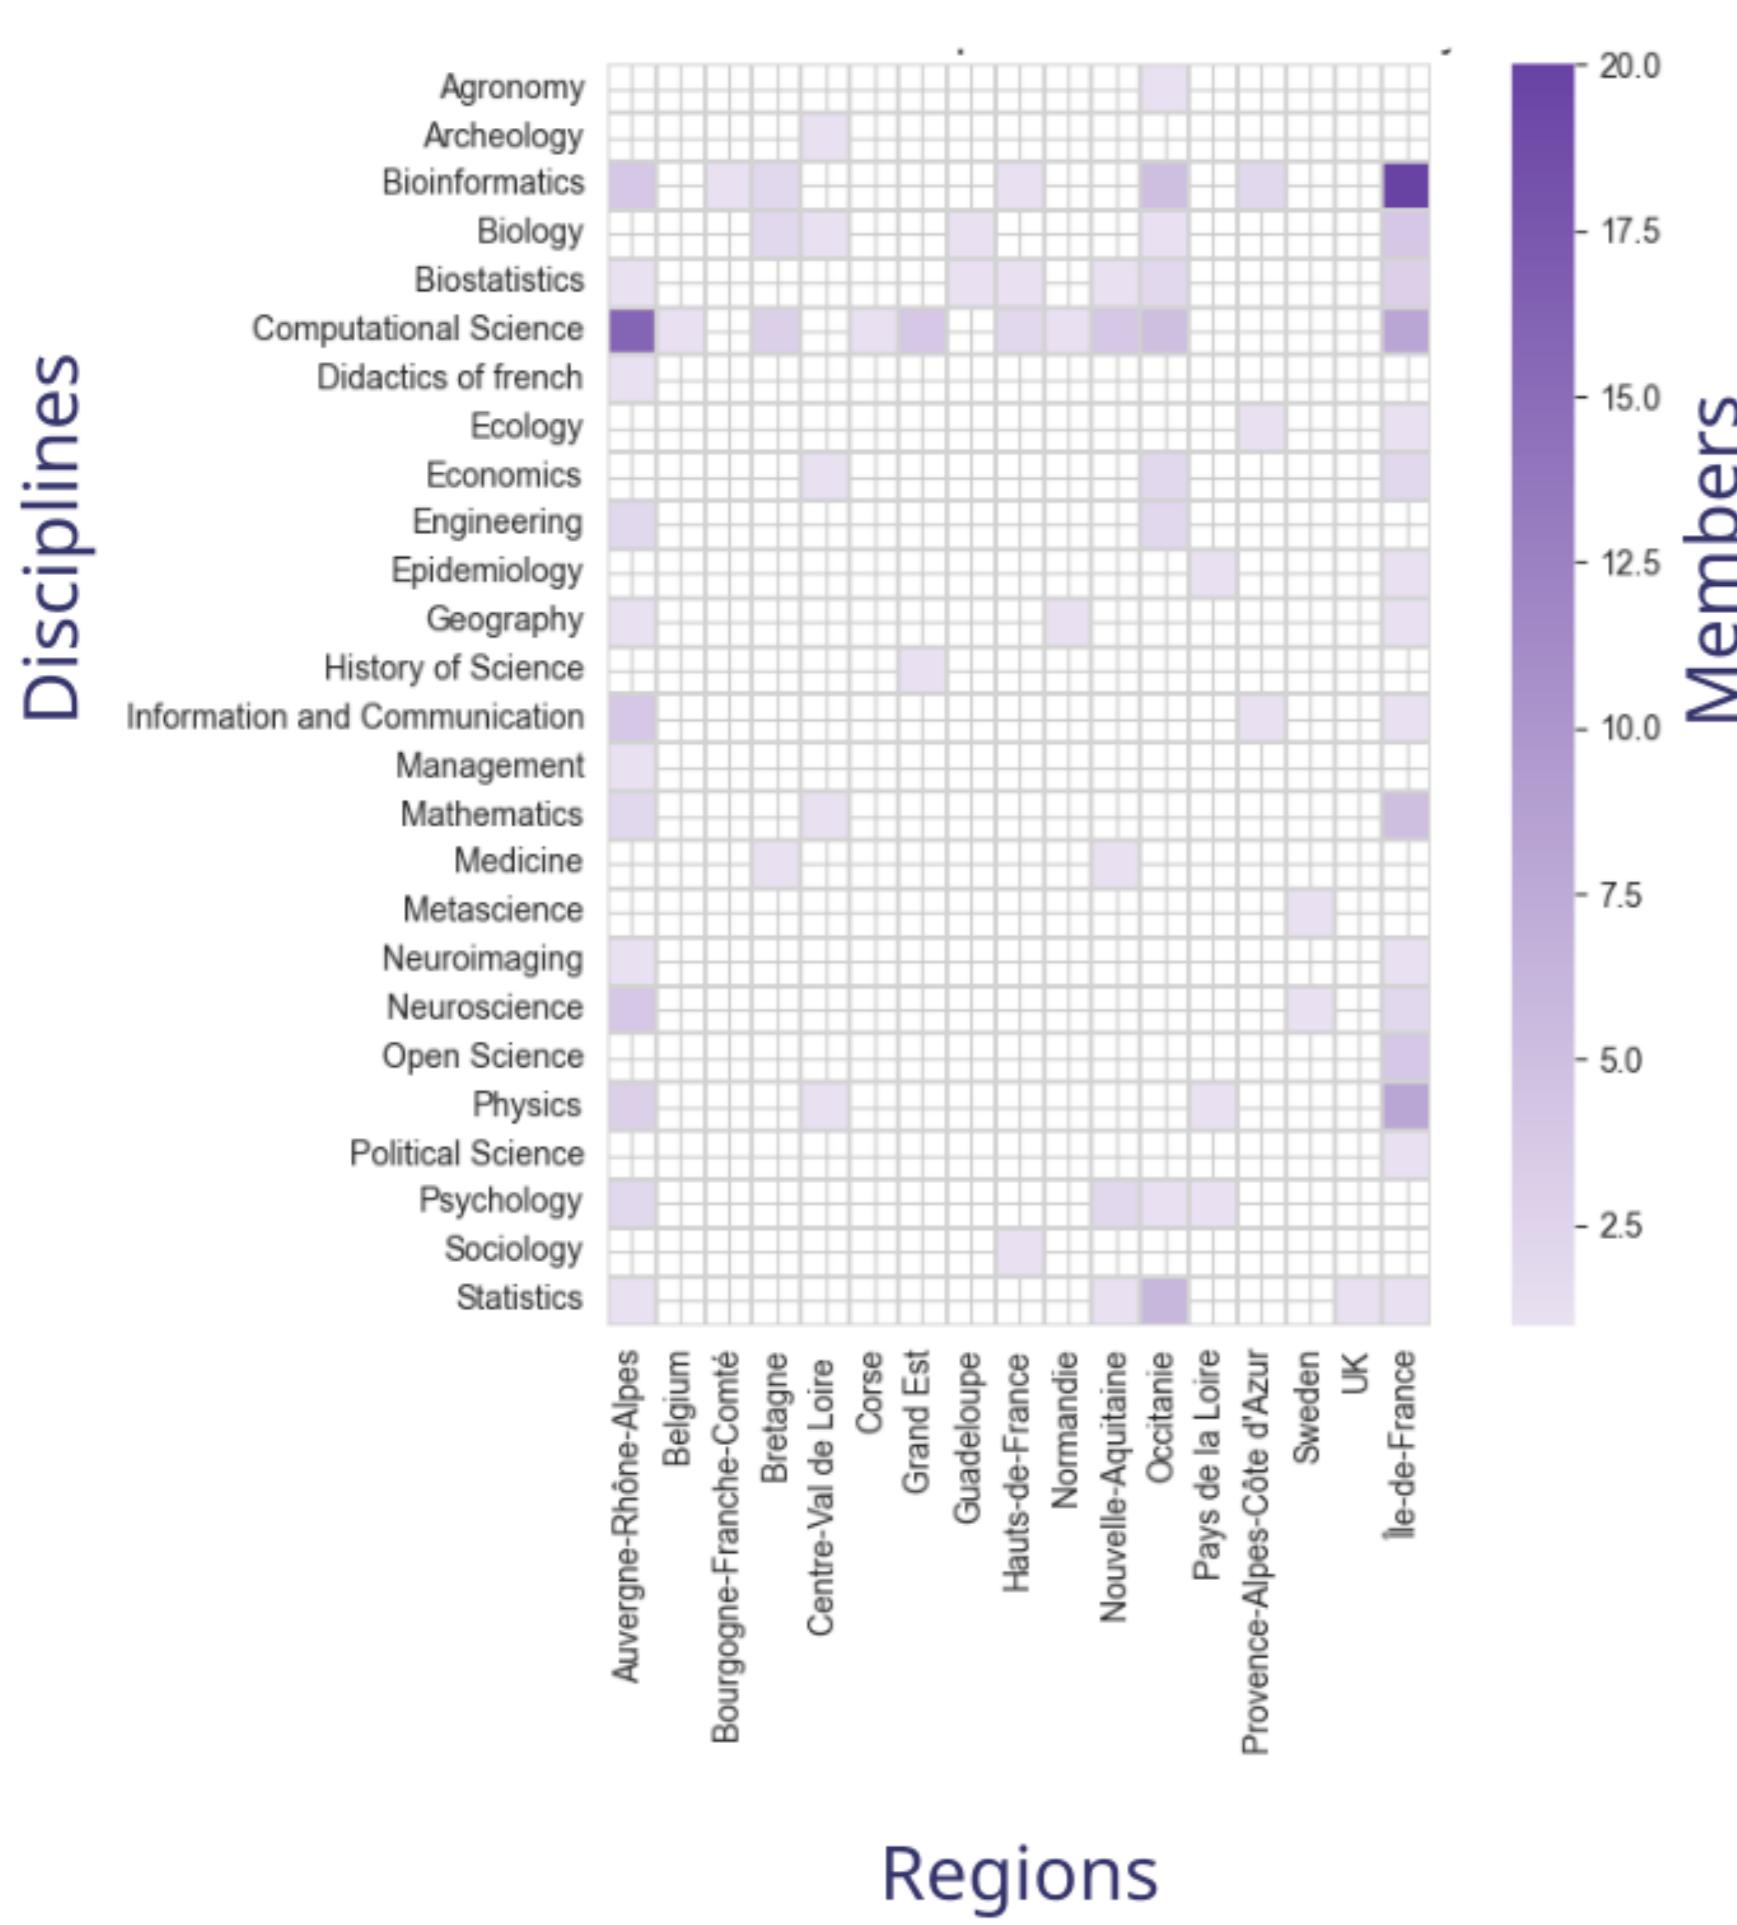

RÉSEAU NATIONAL FRANÇAIS  
RECHERCHE REPRODUCIBLE

## The network

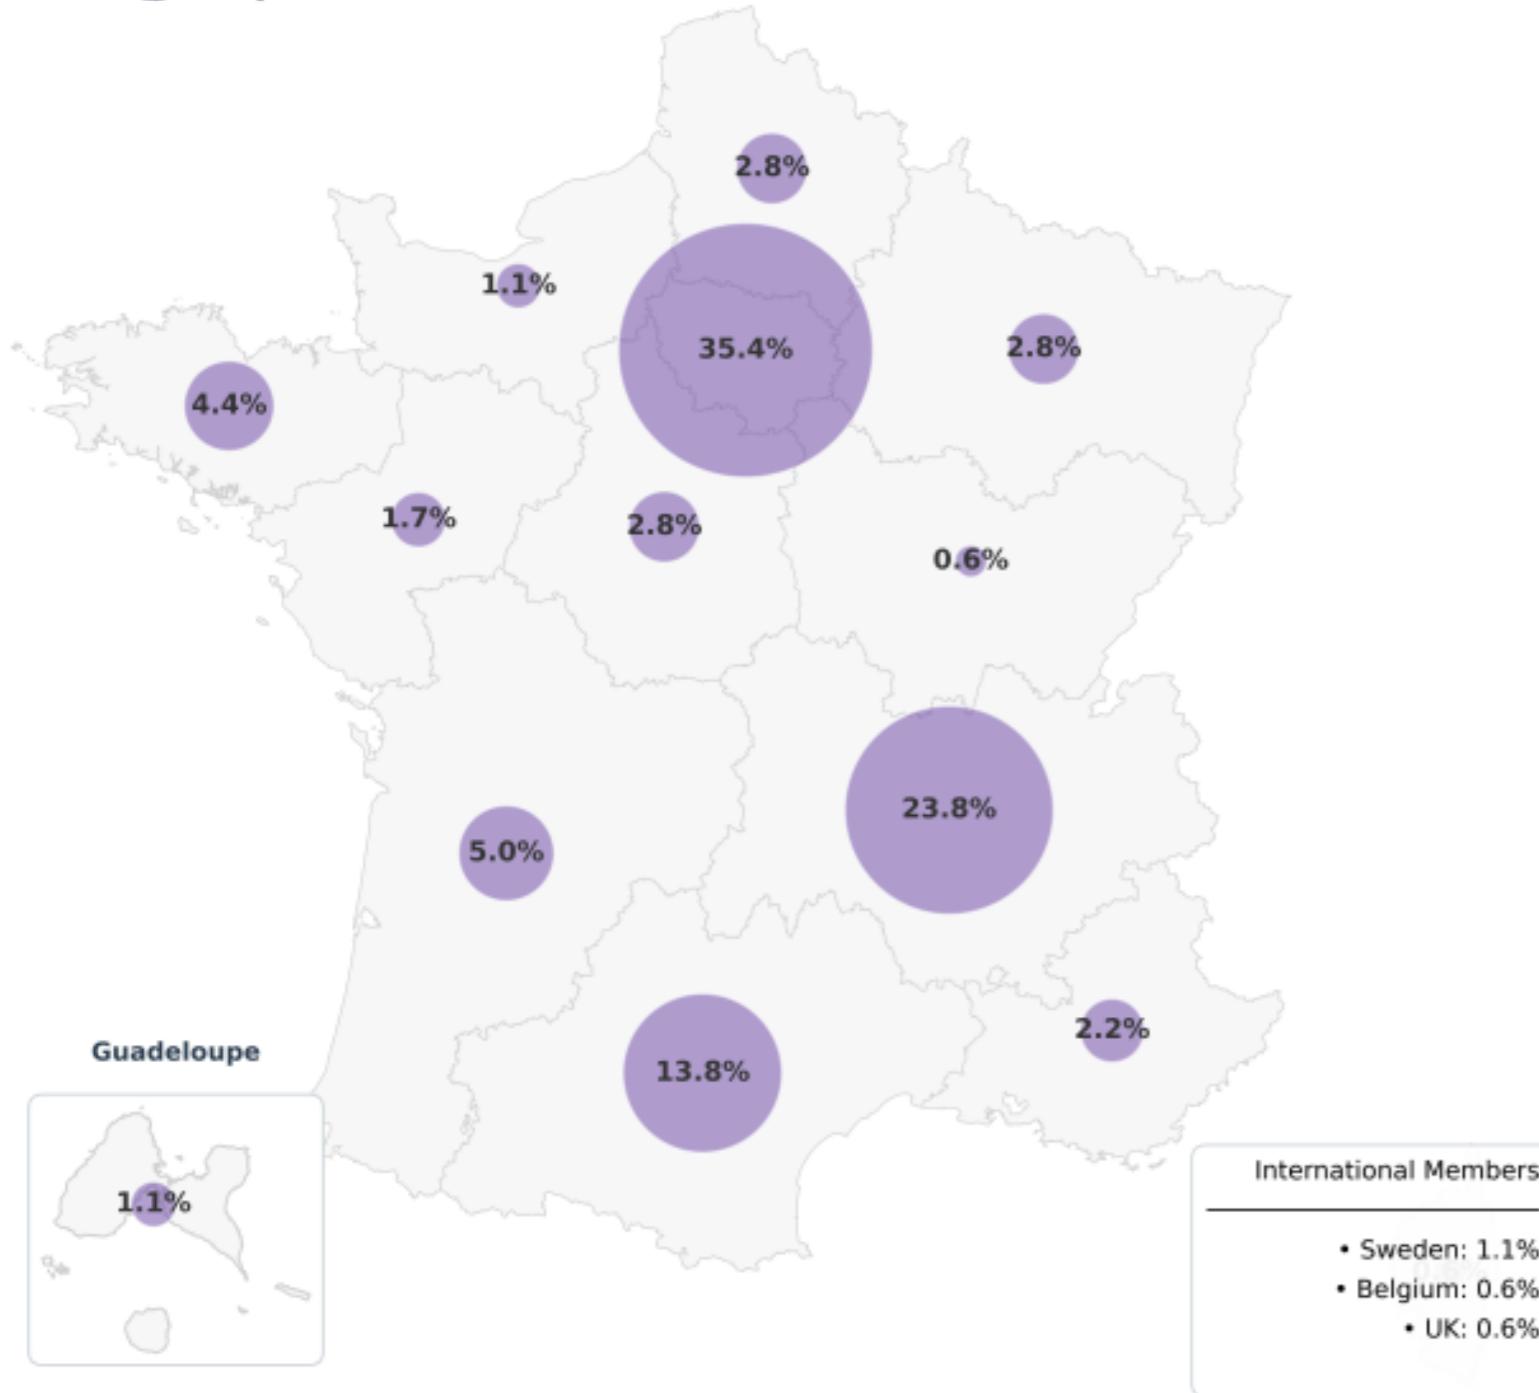

The **French Reproducible Research Network** is an informal national initiative engaging scientists to promote **research reproducibility**.

The network brings together **396 members** from **26 diverse fields** (Fig. 1A) across **14 French regions** (Fig. 1B), covering almost all the french territory. With its **transdisciplinary approach**, it promotes **collaboration** and **knowledge exchange** across disciplines throughout France.

### A Distribution of disciplines across the territory

### B Geographical distribution of the members

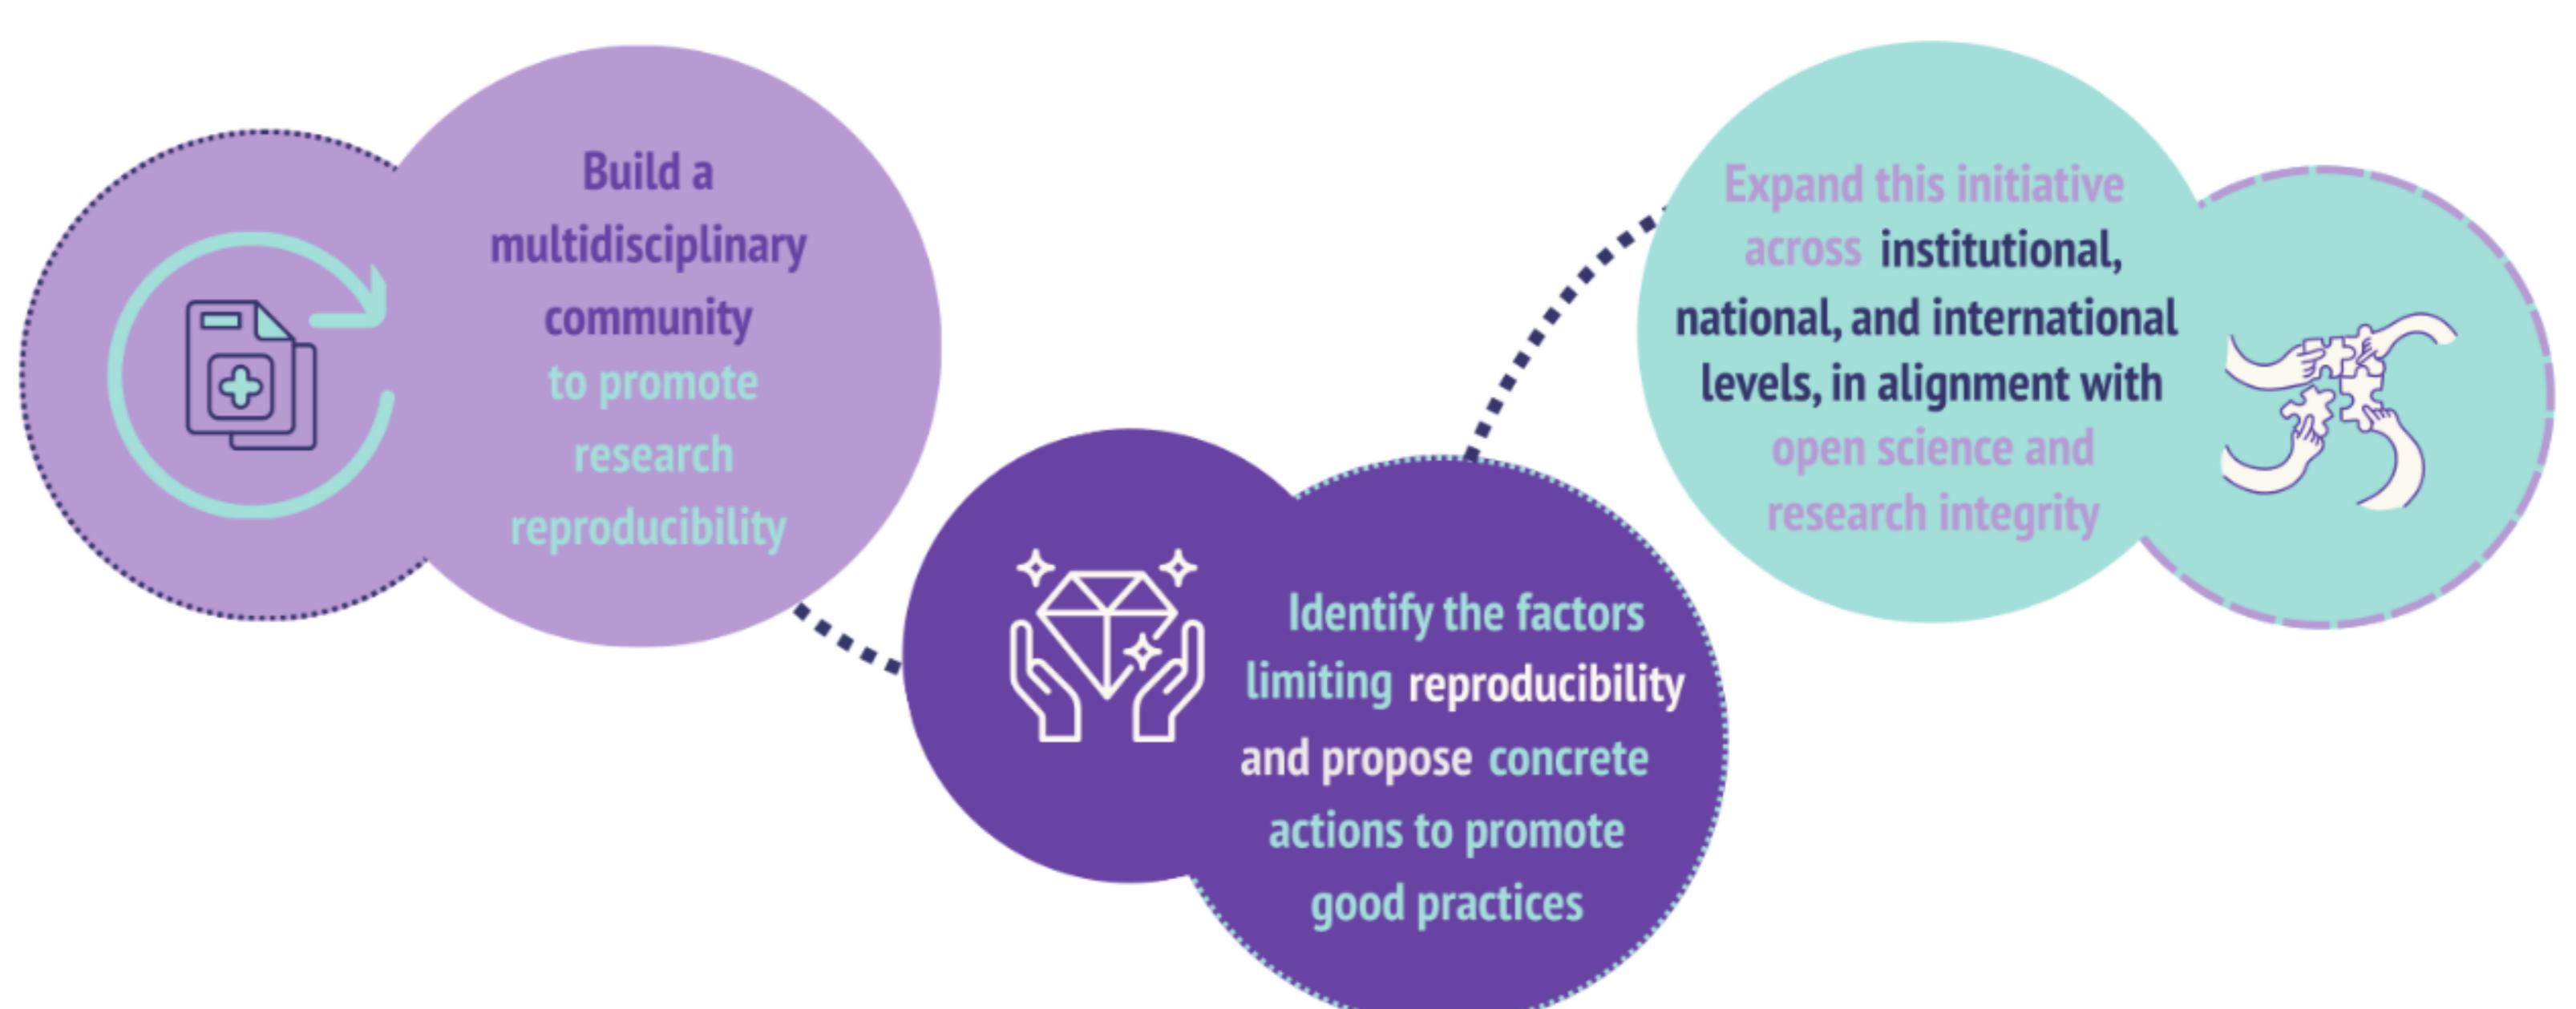

**Figure 1: (A)**  
Distribution of disciplines across the territory. Heatmap representing the number of members of the network by discipline and region. Darker purple shades represent a greater presence of members.  
**(B)** Presence of members in the different regions of France. The presence of the members, as a percentage, is indicated in the center of a circle with the size of the circle being proportional to the percent of members in that region.

## Structure

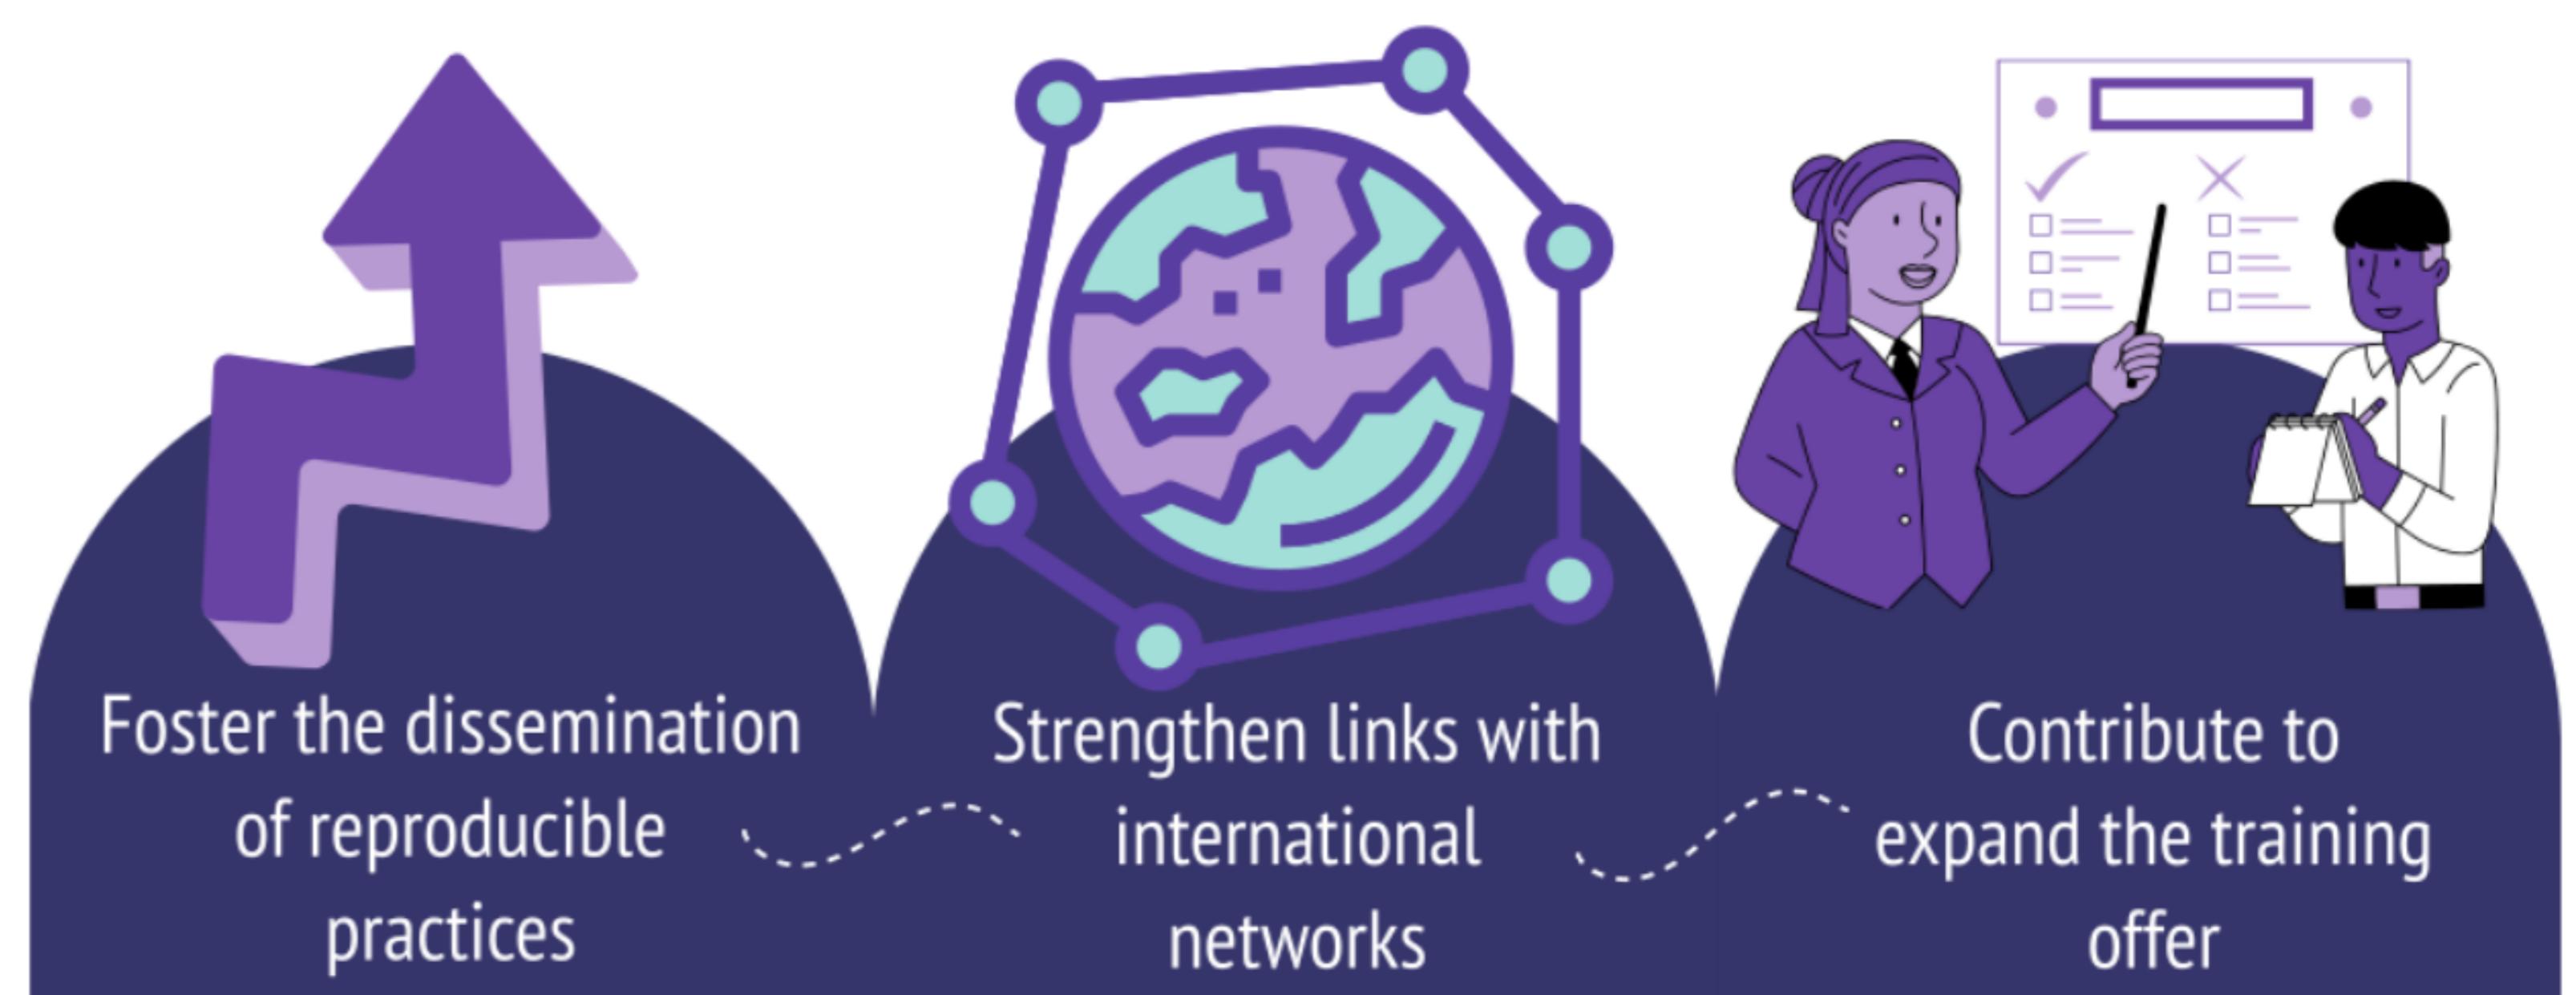

The network has established a structure with three components:

- **A steering committee** that defines priority areas and coordinates various actions
- **Cross-cutting committees** (community engagement, European relations, institutional relations, training)
- **Working Groups** focused on specific topics (software management, psychology, notebooks)

## Aims

## Actions

## Activities

- **Webinars:** 6-8 per year on several themes
- **Annual meetings:** Paris in 2023, Grenoble in 2024, Lyon in 2025, and Bordeaux 2026
- **Collaboration** with **international reproducibility networks**
- **Reproducibility workshops and trainings**
